Subject: Permitting of South Hansen Quarry, Geneva Rock Products, Inc.,
M/035/026, Salt Lake County, Utah

Dear Mr. Christofferson;

Earlier this year the Division met with you and several other employees of Geneva Rock products regarding the need to permit the South Hansen Quarry at the point of the mountain. It was agreed that not all of Geneva's holdings needed to be included in the mining permit since some of the operations were not really mining (asphalt plant, cement batch plant, etc.). However, those areas where mining is occurring need to be permitted and bonded under the Utah minerals program.

During our April 6, 2005 meeting with Geneva, it was agreed that Geneva would post an interim bond that will be held until Geneva has completed the permitting process for the site. Once Geneva has acquired an approved plan, a bond will be calculated for reclamation activities as outlined in that plan.

It is now time to provide the information needed to permit this site. This includes the map delineating the areas needing to be permitted, the notice of intent for a large mining operation (please note that the permit fee application has already been received for the 2005-2006 fiscal year), the operations plan, and the interim bond. The map and interim bond must be provided no later than August 31, 2005. The Notice of Intent and Operations plan should be submitted by September 30, 2005.

Thank you for your help in completing the permitting process for this operation. Please call if you have any questions regarding these requirements or timeframes.

Sincerely,

A handwritten signature in black ink that reads "Daron R. Haddock". The signature is fluid and cursive, with the first name "Daron" and last name "Haddock" clearly legible.

Daron R. Haddock
Permit Supervisor
Minerals Regulatory Program
